WATER RIGHTS**

HUBERT C. LAMBERT
STATE ENGINEER

April 8, 1968

TO ALL WATER USERS OF ESCALANTE VALLEY, BERYL-ENTERPRISE SYSTEM:

At the annual meeting of the Beryl-Enterprise water users held February 14, 1968, policies for 1968 water distribution were set by the State Engineer. So that all water users would be aware of these policies, they are set forth in this notice which is being mailed to all users who pay an assessment.

1. Temporary change applications in 1968 will be limited to strictly emergency measures. They must be filed 30 days prior to any intended usage. They can not be used to cover lands not covered by proper filings, or used to exceed the four acre-foot per acre duty imposed by a decree of the court.
2. A permanent change application policy will be liberal, but nevertheless each application will be closely checked and acted on in accordance with each individual fact situation.
3. Water meters must be installed on all wells being pumped in 1968 as ordered by the court. The maintenance of these meters is the responsibility of the owner of the well.
4. Water users interested in obtaining the water commissioner's annual report must submit their names and addresses in writing to Commissioner Holt who will make copies. File of reports is also available at the Cedar City Area Office and at division headquarters in Salt Lake City.

Water levels will still be studied and the water users periodically informed as to any change.

Yours very truly,

Hubert C. Lambert
Hubert C. Lambert
STATE ENGINEER

DCN/HCL/cn

P.S. The above letter was mailed to the same individuals appearing on the annual meeting list. Mailed April 8, 1968.
